

WSM's Managed Backup as a Service POWERED BY ACRONIS®

- **Implement** IT disaster recovery strategy now
- **Protect** every piece of your IT infrastructure – physical and virtual, Windows, Mac and Linux, servers and desktop and laptop PCs
- **Focus** IT on production tasks – while we take care of data protection
- **Get** hybrid protection and eliminate the risks of losing data
- **Select** the size of backup storage you need today and easily get additional space as your infrastructure grows
- **Eradicate** the costs associated with tapes and cumbersome tape rotation
- **Reduce** risks with proven quick bare-metal recovery from Acronis

WSM's Managed Backup as a Service (MBaaS) powered by Acronis, provides safe, secure and scalable data protection, bare-metal recovery, and on-site and cloud backup of any data, anywhere, anytime. It is a *fully managed* service – we will take care of your data protection and you focus on primary business tasks!

Powered by the Acronis AnyData Engine, WSM's MBaaS backs up disks, partitions, and files to our storage in a secure data center and allows to quickly recover selected files, folders, applications, or an entire system.

With unified MBaaS, you get the dual protection you need in the event of a disaster. The Acronis AnyData Engine backs up to local storage on your premises for quick restore and to secure Acronis Cloud for recovery in the event of a disaster.

Why do you need WSM's MBaaS ?

- To protect your data in the event any disaster
- To quickly and easily implement a hybrid protection strategy
- To replace tape and other legacy backup solutions

Why businesses choose WSM's MBaaS over other backup solutions?

- WSM has almost 15 years experience in migration and disaster recovery related services
- WSM's engineers will ensure the critical data you need to restore operations in the event of a disaster is backed up properly
- WSM's engineers are available in the event of a data loss to assist with full functional recovery of your data/applications
- MBaaS service is fully-managed

Why businesses choose MBaaS powered by Acronis?

- Backup admins trust Acronis' proven bare-metal recovery
- IT Managers value multi-platform data protection
- CIOs trust Acronis brand proven track record and expertise

Key Features

- **Physical and virtual systems** – protection of both physical and virtual systems in one service
- **File and disk image-based backup** - backup of selected files or complete disk images
- **Bare-metal recovery** – recovery to same or dissimilar hardware, even from the cloud
- **Local and cloud storage** – support of local and safe cloud storage in *our secure data center*
- **Initial seeding** to easily move large volumes of data to the cloud:
 1. Backup to an external HDD
 2. Courier it to WSM International or direct to the Acronis data center
- **Multi-level security** – AES-256 encryption, password protection and SSL
- Acronis' **secure software-defined storage data center** are equipped with all latest disaster prevention technologies, and are SSAE 16 certified
