

# Environment Evaluation

migrate.  
transform.  
automate.

## See Potential ROI with Our Risk-Free Evaluation

Your goal is to save time and money. Our goal is to help get you there. We've completed thousands of migrations and can help you determine the path that delivers an optimized environment with the highest ROI for your organization. Whether it's cloud, on-prem, or a hybrid approach, our risk-free Environment Evaluation shares our recommendations of the best option for your business based on potential ROI. After we complete your evaluation, you'll get a report to help you build a business case.

# 50%

of businesses aren't migrating to the correctly sized environment and are **likely overpaying** for resources they *never fully use*.

## What We'll Do

- ✓ Assess up your Linux or Windows servers
- ✓ Run WSM's Cloud Catalyst Software
- ✓ Review inventory of current programs, services, and applications
- ✓ Prepare target architecture for migration
- ✓ Run a remote proactive vulnerability scan of your public-facing websites, applications, and servers
- ✓ Identify high-level efficiency improvements that could be realized through automation

## What You'll Get

- ✓ An inventory of all websites, applications, workloads, services, databases, and versions
- ✓ Details on CPU, memory, load average, and disk usage
- ✓ Report of all vulnerabilities identified and ranked from critical to low, with optional estimates to mitigate
- ✓ Recommendations to leverage automation to further increase ROI and efficiency with optional consulting options
- ✓ Competitive cost analysis of up to 4 hosting providers
- ✓ WSM environment recommendations and estimates
- ✓ A calculation of your potential cost savings per month, per year, and projected ROI date
